# Psychology behind this curriculum

Public Speaking and Communication nurture a child's ability to express themselves with clarity, confidence, and emotional intelligence. With guided practice, students learn to communicate thoughtfully, listen with curiosity, and participate with greater comfort in both classroom and social environments.

The programme strengthens everyday interactions by helping children articulate ideas, understand others' perspectives, and engage in conversations with politeness and ease. As they grow more assured in how they speak and respond, children naturally develop stronger presence, improved collaboration, and a more confident voice in school and beyond.

Our teachers provide individual attention to students, guide them through personalised public speaking tasks, and help them develop clear communication skills, enabling them to express themselves confidently and perform better across all subjects in school.
